

RO^{UVC LED} Filtration

PP Micron
Coconut carbon
800g RO
UVC LED

S800

UP - 801

PP 5mm Pleated filter + Crystalline Coconut Carbon

1st Layer

Effectively inhibits bacterial growth, intercept coarse impurities in the water, such as sediment, rust, colloids.

2nd Layer

Adsorbing residual chlorine, odors, discoloration, heavy metals and retaining minerals that are beneficial to the human body.

UP - 800

R.O. Membrane Filter

0.001 micron

Filter: lime, heavy metals, bacteria, viruses, pesticides, chemicals.

800 GPD

NSF

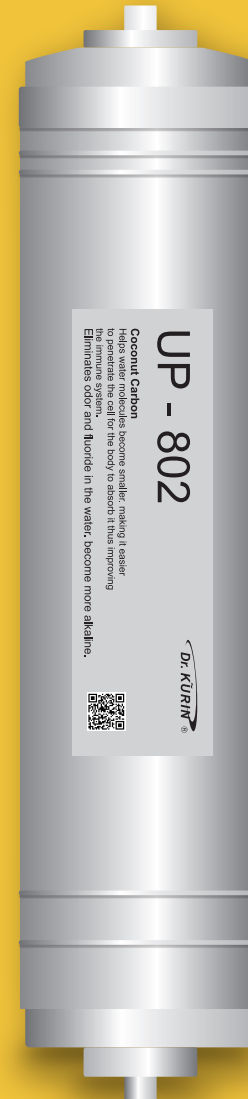

UP - 802

Coconut Carbon

Helps water molecules become smaller, making it easier to penetrate the cell for the body to absorb it thus improving the immune system.

Eliminates odor and fluoride in the water, become more alkaline.

UVC LED

99.9% Sterilize
